Services & Plant Safety

We are an RTO delivering nationally accredited training tailored to meet the specific requirements of civil construction projects. Our specialist trainers are highly qualified and draw on a wealth of industry experience. Programs now available include:

Identify, Locate & Protect Underground Services - RIICCM202D

DURATION: HALF DAY

A short introductory program for civil construction workers/plant operators who need the skills & knowledge to identify, locate and protect underground services such as water, power, gas, telecommunications, etc. Course content incorporates harmonised legislation/guides, DBYD and 'industry best practice' processes, including use of locator.

Work Safely Around Electrical Sources, Services & Assets - CPCCCM3003

DURATION: 1 DAY
ANNUAL REFRESHER
REQUIRED

A 1 day program targeting **safety observers**, supervisors & plant operators working with or around close proximity to overhead & underground power sources/services.

Content reflects WHS harmonised legislation & new guidance material.

Work as a Safety Observer/Spotter – RIIRTM203D

DURATION: 1 DAY

Designed for mobile plant **spotters** & drivers/operators who coordinate safe movement around multiple plant operations on construction & infrastructure projects.

Theory & practical assessments can be contextualised to suit company processes and specific project requirements. Course content reflects WHS legislation & new guidance material.

Training Venues: 19 & 23 Pullman Place, Emu Plains NSW 2750
