RTO #91141

Services & Plant Safety

We are an RTO delivering nationally accredited training tailored to meet the specific requirements of civil construction projects. Our specialist trainers are highly qualified and draw on a wealth of industry experience.

Programs now available include:

Identify, Locate & Protect Underground Services - RIICCM202E

DURATION: HALF DAY

A short introductory program for civil construction workers/plant operators who need the skills & knowledge to identify, locate and protect underground services, such as water, power, gas, communications, etc. Course content incorporates harmonised legislation/guides, new BYDA & 'industry best practice' processes, including use of locator.

Work Safely Around Electrical Sources, Services & Assets - CPCCCM3003 *or* Work Safely in the Vicinity of Live Electrical Apparatus as a Non-Electrical Worker - UETDRE006

DURATION: 1 DAY
ANNUAL REFRESHER
REQUIRED

A one day program targeting **safety observers**, supervisors & plant operators working with or around close proximity to overhead & underground power sources/ services.

Content reflects WHS harmonised legislation & guidance material.

Work as a Safety Observer/Spotter – RIIRTM203E

DURATION: 1 DAY

Designed for mobile plant **spotters** & drivers/operators who coordinate safe movement around multiple plant operations on construction & infrastructure projects.

Theory & practical assessments can be contextualised to suit company processes and specific project requirements. Course content reflects WHS legislation & guidance material.

Training Venues: 19 & 23 Pullman Place, Emu Plains NSW 2750
